

Aaqeeb Hussain

Professional Summary

Frontend Developer skilled in responsive, user-centred applications using React, JavaScript, HTML, and CSS. Experienced in API integration, agile workflows, and Git version control, with a focus on clean code and seamless user experiences. Built web applications, including an anime search platform and a scheduling tool for West Midlands Combined Authority.

Technical Skills

Languages: HTML, CSS, JavaScript, TypeScript

Frameworks: React.js, Next.js

Tools: JSON, JWT, API Integration, Git, GitHub, Testing/Playwright, MUI React Component Library

Professional Experience

School of Code - *Full Stack Developer (Bootcamp)* - Feb 2024 – May 2024

- Developed front-end and back-end solutions, including database management, AI, and quality assurance.
- Implemented user-friendly web interfaces with product management strategies.
- Collaborated with a diverse team using agile practices, paired programming, and weekly hackathons.

Frontend Simplified - *Frontend Developer (Online)* - Jul 2022 – Nov 2022

- Mastered front-end technologies: HTML, CSS, JavaScript, and React.
- Developed dynamic and visually appealing web applications through hands-on projects.
- Built a professional e-portfolio to showcase skills and achievements.

Self-Employed Contractor - *Private Hire Driver* - Oct 2021 – Present

- Resolving trip issues promptly, like traffic or route changes, for a smooth journey.
- Independently managing schedules, planning routes, and making on-the-spot decisions.

Jaguar Land Rover - *Production and Quality Operative* - Jan 2012 – Mar 2021

- Conducted thorough inspections of manufactured parts to detect any defects.
 - Verified that all products met the required quality standards before approval.
 - Worked closely with team members to maintain a seamless workflow and reduce downtime.
-

Projects

WMCA Scheduling Tool [Live Demo](#) [Github repository](#)

- **Brief:** Create a high-level view of scheduled activities across departments for West Midlands Combined Authority.
- **Solution:** Built in ReactJS with Vite for performance, using agile workflows and Git version control.
- **Responsibilities:** Customized components, built filtering systems, and integrated dynamic data displays.

AnimeWorld [Live Demo](#) [Github repository](#)

- Developed a responsive Anime search website with ReactJS and JikanAPI.
- Features included React Router for navigation, React Hooks for state management, and optimized UI for mobile.

NFT Marketplace [Live Demo](#) [Github repository](#)

- Created a responsive NFT marketplace with HTML, CSS, JavaScript, ReactJS, and REST APIs.
 - Implemented real-world development practices with Git/GitHub for version control.
-

Personal Interests

Sports: Enthusiast in cue sports and follower of MMA and boxing.

Anime: Passionate about anime, with a keen interest in its diverse storytelling.
